

OLEG DIDECHKIN

Fullstack Developer, React/Node.js/TypeScript, 4+ years of experience

oleg.didechkin@gmail.com • [LinkedIn](#) • [GitHub](#) • UTC+2

ABOUT

Full-stack developer (TypeScript, React/Next.js, Node.js) with 4+ years in commercial environments across consumer products, internal tools and the odd bit of Web3. My sweet spot lies in work that makes the team faster: performance optimization, build tooling, shared libraries that still hold up six months later. Equally capable building from scratch or wading deep into a mature codebase.

EXPERIENCE

3look

04/2024 — Present

- Extended Konva Canvas Editor to allow the creation of animated GIFs using pre-made or uploaded face components layered onto various templates. Shipped custom uploads, text editing, recently-used assets, and fixes for various cross-browser/device UX bugs.
- Improved monorepo performance and DX: restructured tsconfigs to take TS server feedback in the shared backend package from roughly 5s to sub-second, and cut first-load JS from 240 kB to 105 kB (-56%) using next/bundle-analyzer and knip.

Technologies: TypeScript, React, Next.js, Konva, Tailwind, NestJS, Docker, PostgreSQL, Prisma.

Pragmatic DLT

04/2023 — 03/2024

- Built a battery lifecycle management web app from scratch for a client, enabling their team to process order fulfillment and their customers to check the status of their repairs, recycling, and renewals.
- Created a natural language interface for searching for movies on the web. OpenAI converted each search query to an Elasticsearch query over a large catalog of dialogs, so that customers could search based on movie scripts.

Technologies: TypeScript, React, Next.js, tRPC, Tailwind, Docker, Elasticsearch.

dZENcode

09/2022 — 04/2023

- Developed an internal gRPC microservice that web scraped an outside source and then generated email drafts via the OpenAI API and sent them via Puppeteer through Outlook.

Technologies: TypeScript, Node.js, Python, Django.

EDUCATION

National Aerospace University Kharkiv Aviation Institute, Ukraine

2023 — 2024

Master — Computerization of information processing and management

National Aerospace University Kharkiv Aviation Institute, Ukraine

2020 — 2023

Bachelor — Computer Science

SKILLS

Frontend: React, Next.js, TypeScript, Tailwind, shadcn/ui, Radix, CSS Modules/SCSS

State & data: Zustand, TanStack Query, MobX, React Context

Backend: Node.js, NestJS, tRPC, Next.js API routes & Server Actions, REST

Databases: PostgreSQL, Prisma, Redis

Infra & DevOps: Vercel, DigitalOcean, Docker, GitHub Actions, Nginx

Other: Canvas/Konva (custom editing system), Lottie animations, Telegram bots, wagmi, viem, Ethereum smart contracts & wallet integrations, Git, Husky
